What is your Dosha/Ayurvedic body type?

In Ayurveda, your body type is referred to as your 'dosha'. There are three different doshas; Vata, Pitta and Kapha which are made up of the 5 key elements of life – ether, air, fire, water and earth.

Our doshas impact all aspects of our lives including our psychology, emotional responses, career choice, food likes and dislikes, musical preferences and even how fast we speak and the way we deal with stress.

Determining your dosha can help you maintain a balanced state of health and wellbeing as it allows you to adopt a lifestyle that perfectly suits your body type.

Take our quiz to find out what your body type is now!
